

*Life is not a race,
but a journey to be savored each step of the way.
Yesterday is history, tomorrow is a mystery
and today is a gift.*

All our linen products are made from

BAMBOO FABRIC

Bamboo fabric contains a natural and unique agent called "bamboo kun" which has natural antibacterial and antifungal properties.

This means your bed linen will stay fresher for longer, does not retain odors and is more healthy and hygienic.

It is also ideal for people prone to skin irritation as it is extremely comfortable next to the skin and is produced without "softening" chemicals.

As one of the world's fastest growing plants, bamboo is one of nature's most sustainable resources.

Grown organically without pesticides, fertilizers or chemicals

bamboo can grow at an amazing rate of up to one meter per day.

It absorbs more greenhouse gasses, produces more oxygen and matures four times faster than conventional trees which can take decades to grow to maturity.

As a natural cellulose fibre, it is 100% biodegradable, breaking down easily in soil through the combined power of micro-organisms and sunshine.

This decomposition process does not cause any pollution to the environment.

L005a
Sheet Fitted & Face Cradle
Bamboo Fibre White

L 008
Bolster Foam + Vinyl 70 cm
L 003
Bolster Cover 70 cm
